Petition:

To the House of Commons.

The petition of the residents of Mid Devon within the constituency of Tiverton & Honiton,

Declares that the application to develop an inert landfill and construction waste recycling facility at Greenway in the parish of Halberton should be stopped.

The petitioners therefore request that the House of Commons urges the government to ensure that permission for the creation of an inert landfill and construction waste recycling facility at Greenway in the parish of Halberton should not be granted. This is to protect the public from a dangerous increase in HGV traffic movements on nearby housing estates and villages that would form the route to the application site; to protect local communities from noise, dust, odours and vibrations from the increase in HGV movements; to protect the setting of the nearby Grand Western Canal and Country Park and the three historic canal bridges that would see an increase in HGV traffic; to protect the environment from the increased pollution caused by transporting waste to the site as only a small proportion is expected to be created in the local area.

And the petitioners remain, etc.
